fun-miRBench Benchmark Report

Run setting	Value
Experiments evaluated	21
Experiments skipped	0
Predictors evaluated	5
Responsive genes	oriented shrunken log2FC > 0; FSOS s-value < 0.05 against d = 0.5
No-response genes	whole shrunken 95% interval of the oriented change below d = 0.5

Evaluation design

- Every predictor is scored on the same 19,226 genes; unscored genes rank last.

- Unresolved genes are left out of the AUROC.

- AUROC on 17 of 21 experiments (at least 30 responsive and 30 no-response genes).

- Spearman on all 21 experiments.

Key results

- Highest mean AUROC: miRBind2-3UTR (0.643).

- Highest mean Spearman: miRBind2-3UTR (0.095).

- Highest responsive pair coverage: miRBind2-3UTR (99.9%).

- Lowest responsive pair coverage: miRDB (21.5%).

Output tables

- per_comparison.tsv: every metric, for each experiment and tool.

- summary.tsv: means and 95% intervals, on all experiments and on unflagged ones.

- coverage.tsv: genes and pairs covered, and experiments retained, per tool.

- recovery.tsv: recall per experiment and tool, at each prediction budget.

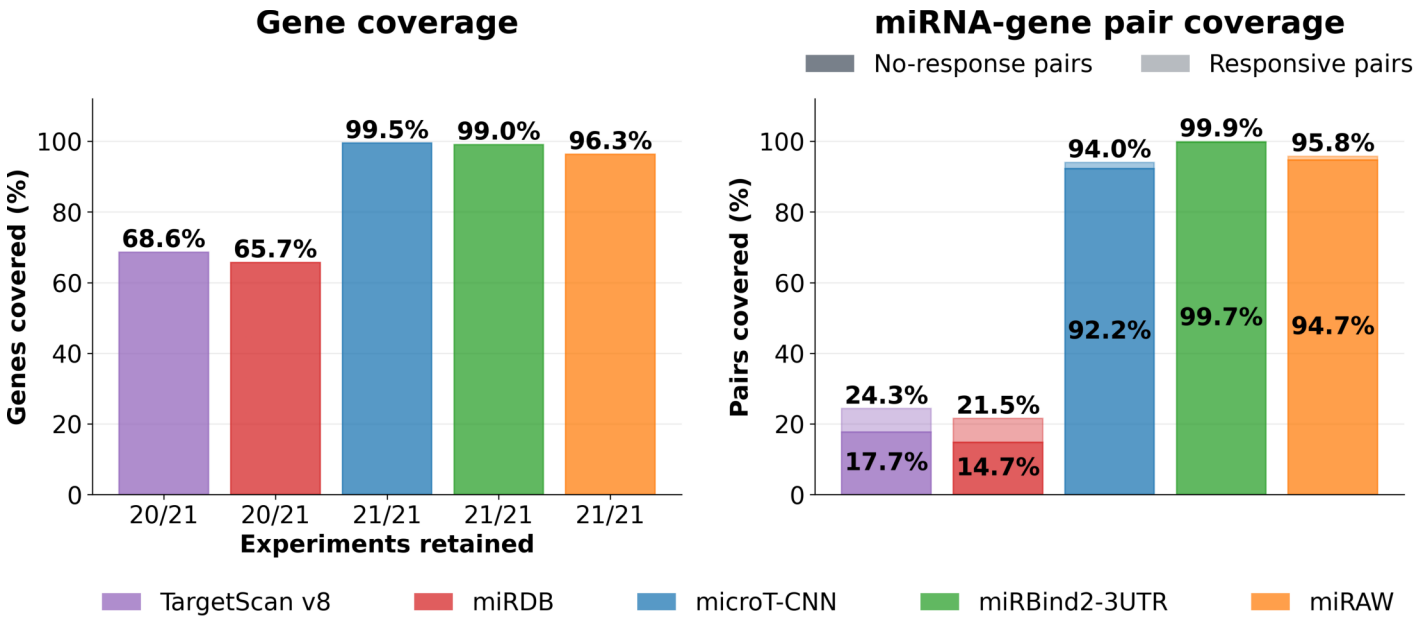

- precision_at_recall.tsv: precision and false positives at 50% recall.

Coverage

- Gene coverage: share of measured genes the tool scores in at least one experiment.

- Experiments retained: experiments where it scores responsive and no-response genes.

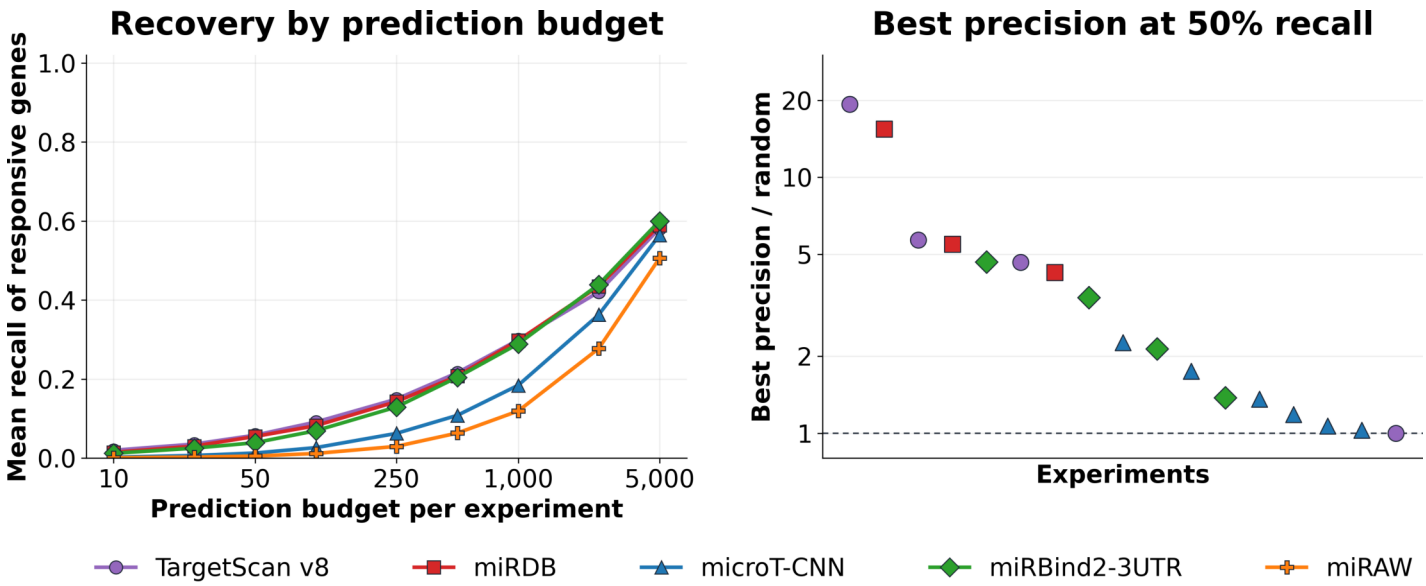

- Pair coverage: share of responsive and of no-response miRNA-gene pairs it scores.

Recovery

- Recall: share of responsive genes among the top-ranked genes, mean over experiments.

- Best precision / random: best tool's precision at 50% recall over responsive share.

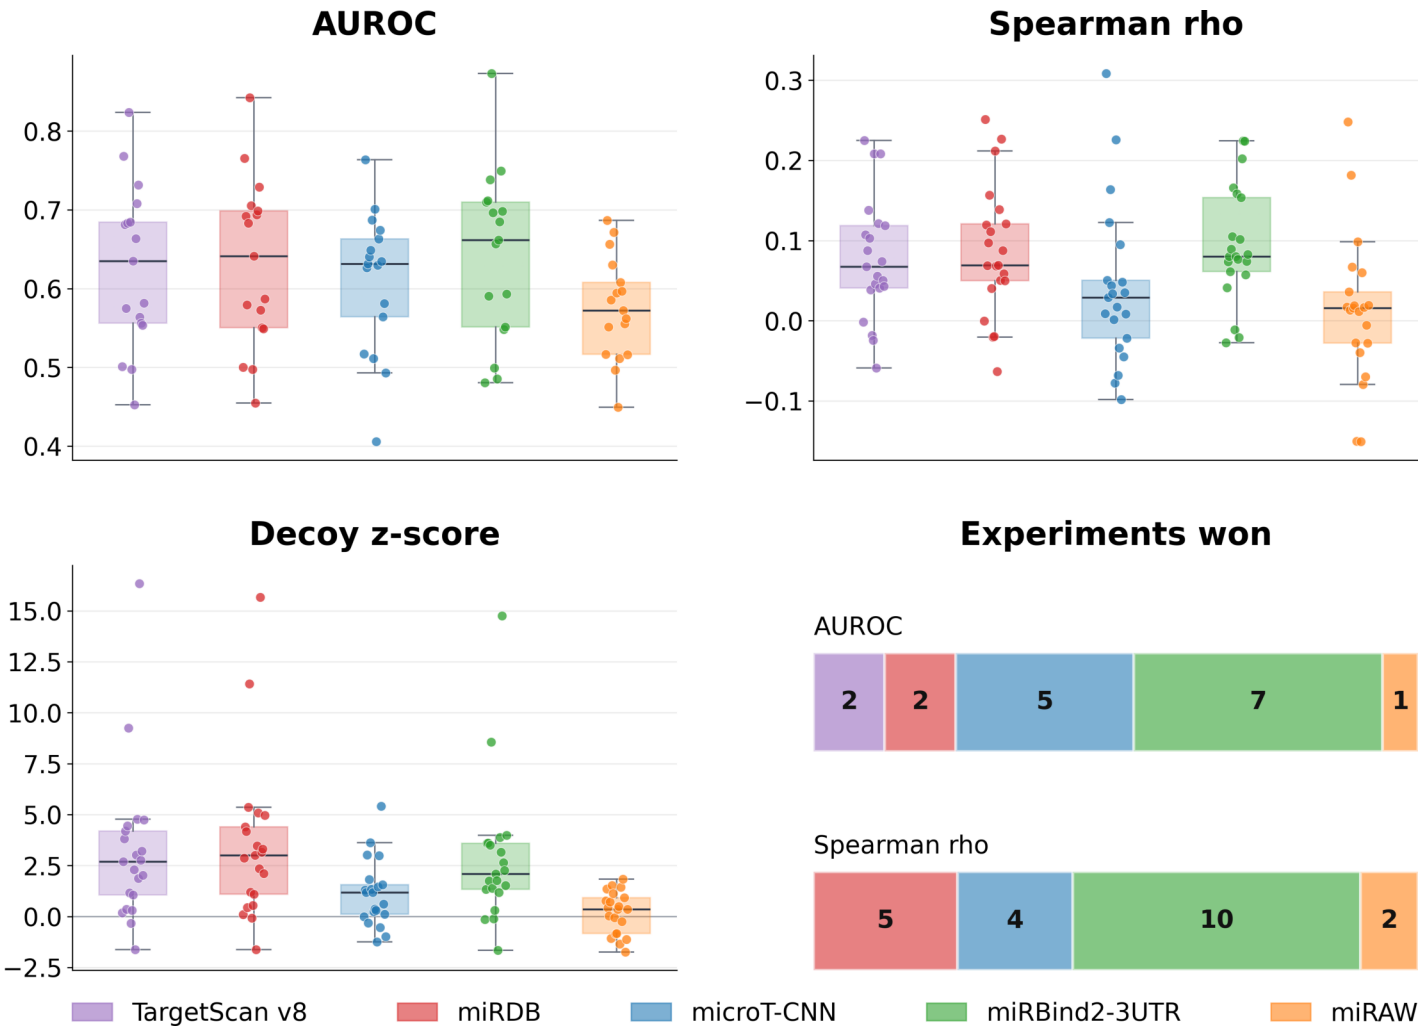

Performance

- AUROC: chance that a responsive gene scores above a no-response gene; 0.5 is chance.

- Spearman rho: agreement of the score's ranking with the shrunken log2FC; 0 is none.

- Decoy z-score: Spearman for the tested miRNA against different-seed miRNAs, in SDs.

- Experiments won: experiments where the tool has the highest AUROC or Spearman rho.

Coverage

Predictor	Gene coverage	Experiments retained	Responsive pairs	No-response pairs
TargetScan v8	68.6%	20/21	24.3%	17.7%
miRDB	65.7%	20/21	21.5%	14.7%
microT-CNN	99.5%	21/21	94.0%	92.2%
miRBind2-3UTR	99.0%	21/21	99.9%	99.7%
miRAW	96.3%	21/21	95.8%	94.7%

Performance

Predictor	Mean AUROC	Mean Spearman	Mean decoy z-score	Won, AUROC	Won, Spearman
TargetScan v8	0.627	0.078	3.169	2	0
miRDB	0.632	0.087	3.478	2	5
microT-CNN	0.610	0.040	1.116	5	4
miRBind2-3UTR	0.643	0.095	2.827	7	10
miRAW	0.574	0.012	0.194	1	2

Recovery

Predictor	Mean recall at 5,000 genes	Experiments won at 50% recall
TargetScan v8	0.582	4
miRDB	0.589	3
microT-CNN	0.565	6
miRBind2-3UTR	0.600	4
miRAW	0.506	0
